

Testcases Of Facebook Login Page	
1001	Check the login functionality with a valid email id and valid password.
1002	Check the login functionality with a valid email id and
1003	Check the login functionality with an invalid email id and valid password.
1004	Check the login functionality with an invalid email id and invalid password.
1005	Check the login functionality with a blank email id and password.
1006	Check the login functionality with a blank email id and valid password.
1007	Check the login functionality with a valid email id and a blank password.
1008	Check the login functionality with a valid phone number and valid password.
1009	Check the login functionality with an invalid phone number and valid password.
1010	Check the login functionality with a valid phone number and invalid password.
1011	Check the login functionality with a blank phone number and valid password.
1012	Check the length of the email address and password field.
1013	Check the error message displayed when any field is left blank.
1014	Check the Tab key functionality on the Login page.
1015	Check the remember me checkbox functionality
1016	Check if the welcome message is displaying after successfully login into the application.
1017	Check the Forgotten Password functionality.
1018	Check whether the password text format is encrypted or not.
1019	Check if the correct error message is displing for the invalid inputs.
1020	Check if the layout of the login is as per the specification.
1021	Check if the placeholders are displaying properly or not.
1022	Check if the * is displaying, which are mandatory fields.
1023	Check is the checkbox, radio button, and text fields are as per the specification.
1024	Check if the login page is responsive or not.
1025	Check on click of the back button of the browser; the user should be logged out of the application.
1026	Check whether a user can log in directly by entering the URL in the browser.
1027	Check the login session timeout functionality.
1028	Check whether the password field is encrypted or not.

Manual Testing Assessment Test

Testcase ID	Functionality ID	Testcase Name	Testcase Summary	Pre-Condition	Steps	Test Data	Expected Result	Actual Result	Status
1	1001	Verify website url	when i click on website it's open properly	Internet, Browser & Website in working condition	1. Enter Url in Address bar		it Must open proper website	As per expected result	Pass
2	1002	Verify tab view	it's show proper logo and website name	Internet, Browser & Website in working condition	1. Enter Url in Address bar		it Must open proper website	As per expected result	Pass
3	1003	Verify tab preview	it's show proper preview	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open new tab 3. Put cursor on website tab		it Must shows proper tab preview	As per expected result	pass
4	1004	Verify email or phone number bar	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. open website 3. Put cursor on email or phone number box		when we click on it than it Must be clickable	As per expected result	pass
5	1005	Verify email or phone number bar	it should be shows us hover effect when we put cursur on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on email or phone number box		we put cursur on it than Must shows us hover effect	As per expected result	pass
6	1006	Verify email or phone number bar	we could enter a valid value in this box	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on email or phone number box		we Must enter a valid or proper value in this box	As per expected result	pass
7	1007	Verify email or phone number bar	we should enter either email or phone number	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on email or phone number box	adpatel7747@gmail.com 9856327859	we Must enter phone number or email eaither one	As per expected result	pass
8	1008	Verify password	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on password		when we clcik on it than it Must be clickable	As per expected result	pass
9	1009	Verify password	it should be shows us hover effect when we put cursur on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on password		we put cursur on it than Must shows us hover effect	As per expected result	pass
10	1010	Verify password	the password should be at least 8 characters	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on password	hingrajija	password Must atleast 8 characters so it is secure	As per expected result	pass
11	1011	Verify forgot password	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on forgot password		when we clcik on it than it Must be clickable	As per expected result	pass
12	1012	Verify forgot password	it should be shows us under line effect when we put cursur on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on forgot password		we put cursur on it than Must shows us underline effect	As per expected result	pass

13	1013	Verify login botton	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on log in botton	when we click on it than it Must clickable	As per expected result	pass
14	1014	Verify create account	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on create account	when we click on it than it Must clickable	As per expected result	pass
15	1015	Verify create account	it should be shows us hover effect when we put cursur on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on create account	we put cursur on it than Must shows us hover effect	As per expected result	pass
16	1016	Verify create a page option	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on create a new page	when we click on it than it Must clickable	As per expected result	pass
17	1017	Verify create a page option	it should be shows us under line effect when we put cursur on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on create a new page	we put cursur on it than is Must shows us underline effect	As per expected result	pass
18	1018	Verify language in footer	the language should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on languages on footer options	when we click on it than it Must clickable	As per expected result	pass
19	1019	Verify language in footer	there should be many diffrent languages	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on languages on footer options	there are many laguages Must required	As per expected result	pass
20	1020	Verify pluse option in footer	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. check footer	when we click on it than it Must clickable	As per expected result	pass
21	1021	Verify pluse option in footer	when we click on pluse option than it should be navigates us to show more language	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. check footer	when we click pn it than it Must shows us more language	As per expected result	pass
22	1022	Verify footer option	it should be shows us under line effect when we put cursur on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. check footer	we put cursur on it than Must shows us underline effect	As per expected result	pass
23	1023	Verify footer option	it should be clickable when we click on it	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. check footer	when we click on it than it Must clickable	As per expected result	pass
24	1024	Verify login botton	when we put cursur on it thann it should not be show hover effect	Internet, Browser & Website in working condition	1. Enter Url in Address bar 2. Open website 3. Put cursor on log in botton	when we click on it than it Must shows us hover effect	when we click on it than it not showing us any effect	Failed

Manual Testing Assessment Test

Test ID	Functionality ID	TestCase Name	Test Summary	Pre - Condition	Steps	Test Data	Expected Result	Actual Result	Status
1	1001	check login functionality in responsive ui	check entering url in address bar its open the login page or not	Internet, Browser & Website in working condition	1.enter url in adress bar 2. press f12 function in chrome browser	https://www.facebook.com/	it should open login page	as per expected results	pass
2	1002	check login functionality in responsive ui	check login page is responsive or not	Internet, Browser & Website in working condition	1.enter url in adress bar 2. press f12 function in chrome browser		it should responsive	as per expected results	pass
3	1003	check login functionality in responsive ui	check facbook logo is clickable or not	Internet, Browser & Website in working condition	1.enter url in adress bar 2. press f12 function in chrome browser		it should be clickable	as per expected results	pass
4	1004	check login functionality in responsive ui	check facebook logo redirect to homepage or not	Internet, Browser & Website in working condition	1.enter url in adress bar 2. press f12 function in chrome browser		it should redirect to home page	as per expected results	pass
5	1005	check login functionality in responsive ui	check login functionality without any validation	Internet, Browser & Website in working condition	1.enter url in adress bar 2. press f12 function in chrome browser		it should show error message	as per expected results	pass
6	1006	check login functionality in responsive ui	check email field has proper validation or not	Internet, Browser & Website in working condition	1.enter url in adress bar 2. press f12 function in chrome browser		it should have proper validation	as per expected results	pass
7	1007	check login functionality in responsive ui	check login functionality with email id and without password	Internet, Browser & Website in working condition	1.enter url in address bar 2.press f12 function in chrome browser 3.enter email id	ashreyapatel7@gmail.com	it should show error message	as per expected results	pass
8	1008	check login functionality in responsive ui	check password field has proper validation or not	Internet, Browser & Website in working condition	1.enter url in address bar 2.press f12 function in chrome browser 3.enter password	567894123	it should have proper validation	as per expected results	pass
9	1009	check login functionality in responsive ui	check login functionality with password and without email id	Internet, Browser & Website in working condition	1.enter url in address bar 2.press f12 function in chrome browser 3.enter password	818181223	it should show error message	as per expected results	pass
10	1010	check login functionality in responsive ui	check login functionality by using proper validate email id and password	Internet, Browser & Website in working condition	1.enter url in address bar 2.press f12 function in chrome browser 3.enter email id and password	shreyapatel@gmail.com 9408308181	it should redirect to page	as per expected results	pass
11	1011	check login functionality in responsive ui	check forget password option redirect to other page or not	Internet, Browser & Website in working condition	1.enter url in address bar 2.press f12 function in chrome browser 3.click on forget password option		it should redirect to other page	as per expected results	pass

Defect ID	Defect Summary	Mobile Device/Version No	Step	TestDate	Defect types	Defect Severity	Defect Priority
1001	we can login with same email in multiple similar devices at a same time without any verification which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) login 2 different devices with same id	10-4-24	security	High	High
1002	"when we shoping as a guest and go for pay there is Net banking option in this we can not redirect to our bank payment page every time shows message that ""mandatory param txnid is missing"" after selecting bank	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) select the items 3) place order 4) go to net banking and click on pay	10-4-24	functionality	High	High
1003	when we shoping as a guest and go for pay there is stored card option in this we can not store new card details every time shows message that "issue connecting"	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) select and add to cart item 3) click on place order 4) go to stored card 5) click on add new card .	10-4-24	functionality	High	High
1004	when we enter wrong password at login time there are no verification task for that person	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to signin the app	10-4-24	security	High	High
1005	some times it takes extra load time which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) try every activity	10-4-24	usability	High	low
1006	add new address in payment option is working but not showing in deliver to addresses	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) add address 4) add new address	10-4-24	functionality	low	High
1007	Receivers name field is accept the numbers its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1008	Receivers name textbar is accepts the special characters which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1009	Pincode textfield is also accept the wrong pin which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1010	House no. textfield is accept the speciall characters its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1011	House no. textfield is also accept the Emojies its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1012	Colony textfield is accept the speciall characters its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1013	Colony textfield is also accept the Emojies its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1014	City name textfield is accept the speciall characters its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1015	City name textfield is also accept the Emojies its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High

1016	City name field is accept the numbers its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1017	in category left jewellery option shows types of category repeate and repeate when we click on it which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) login the application 3) go to category	10-4-24	functionality	low	low
1018	Check Online payment method Not Working And Wrong Massages Display MobikWik	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add item to cart 3) place order 4) use mobiwik payment	10-4-24	functionality	High	High
1019	after select the state we can enter diffrent state city in city field / city name textfield is accept any city name which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	High
1020	Enter your name not have any minimum text limit	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	normal
1021	house no not have any minimum text limit	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	normal
1022	colony field not have any minimum text limit	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	normal
1023	City field not have any minimum text limit	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	functionality	low	normal
1024	Check jeweler application poor Response time	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) try every activity	10-4-24	usability	High	low
1025	no content found for the filter message shoven in some fields (like gemstone ring, gemstone earrings)	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) check different categories	10-4-24	usability	High	low
1026	Checking application not User Friendly	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) try every activity	10-4-24	usability	High	High
1027	when we add an address it not shows in proper formate title of info. in the address (like name city address)	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) place order through cart 3) go to add address page	10-4-24	GUI	High	low
1028	help center number is always not working	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to account details 3) go to help centre	10-4-24	usability	High	low
1029	in registration we can enter any email address its not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	usability	low	low
1030	in ragistration we can enter wrong domain name which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	usability	low	High
1031	in registration there are no minimum limit to enter the email	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	functionality	low	High
1032	in registration there are no maximum limit to enter the email	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	functionality	low	High

1033	in registration there are no max limit to enter the password	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	functionality	low	High
1034	in registration we can enter any mobile no. there are no verification which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	security	Low	High
1035	in registration we can enter wrong email there are no verification	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	security	Low	High
1036	when we login there are no email verification	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) login	10-4-24	security	Low	High
1037	after logout our cart item is still in the cart	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) login app 3) add to cart item 4) logout	10-4-24	functionality	low	low
1038	we can add item to cart when we not loggin which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) without login add item to cart	10-4-24	functionality	low	High
1039	we can add item to wishlist when we not loggin	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add item to wishlist instantly without login	10-4-24	functionality	low	High
1040	no human verification check box in login or registation page	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) login or register	10-4-24	security	High	High
1041	Forget password sending email is not working	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) login 3) forget password	10-4-24	functionality	High	High
1042	At registration page at the end there are 2 button for direct login (Facebook and Google) compare button size is different which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to new signup/Registration page	10-4-24	GUI	Low	low
1043	we can enter card details even if sometime it wrong there's is no popup message	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) select the items 3) place order 4) go to net banking and click on pay	10-4-24	functionality	normal	High
1044	sometime card detail wrong but when we click on pay now button there is no action of button or button is not clickable, it necessary to show message that "something wrong in details"	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) select the items 3) place order 4) go to net banking and click on pay	10-4-24	functionality	High	High
1045	in some older version of mobile devices there are some functionality which is not visible (example delete item symbol option in cart)	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) check all Functionality in old device	10-4-24	GUI	High	Low
1046	when we click on add item button to cart and that button show go to cart and navigate to the cart with qty-1 but when we go back on that added item main page it showing same add to cart button which is suggested not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) open item post 3)add item to cart and go back	10-4-24	functionality	normal	High

1047	if we Re-click on add to cart button of main item page then it must show message that item is already in the cart	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) open item post 3)add item to cart and go back 4) re click on add to cart	10-4-24	functionality	normal	High
1048	there is no qty selection option before we add item on cart which is suggested not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go any category and open post	10-4-24	functionality	High	normal
1049	there is a blank space on item page in between additional details and more from that item post which is suggested not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) open any post of item 3) scroll down	10-4-24	GUI	Low	Low
1050	when we share particular item post link from WhatsApp and open it from the WhatsApp it only opens application but not that item post	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) open any post 3) click on share button and share through WhatsApp	10-4-24	functionality	High	High
1051	when we just add any item to add to cart and exit it shows multiple annoying notification in minimum time period which is suggested not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add item to cart 3) wait some time	10-4-24	usability	High	low
1052	if we Re-click on add to cart button of main item page then it should be increased the quantity of that item it's not working which is suggested not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) open item post 3)add item to cart and go back 4) re click on add to cart	10-4-24	functionality	normal	High
1053	there is no delete all item at a time option button in a cart so it suggested not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to cart	10-4-24	functionality	normal	normal
1054	when we click on remove particular item option in a cart it shows details of product which also shows the qty drop-down button it's not clickable but here button design is not needed (suggested) , developer just simply write the qty.	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) go to cart 3) click on remove	10-4-24	GUI	Low	Low
1055	when we go to filters in discount perecent there are option for 100% discount which is suggested as not valid because it should be up to 80% discount	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) select category 3) go to discount price filter	10-4-24	usability	High	normal

1056	when we go to payment on freecharge it shows the field of mobile number which is already by default filled this number must be transparent in the field as an example	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add item to cart and place order 3) choose freecharge payment method	10-4-24	GUI	Low	Low
1057	format of item posts in whole application is not proper	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) choose any category	10-4-24	GUI	Low	Low
1058	some times we add item to mywishlist it not added at that time it added after we reopen the app.	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add to wishlist instantly many items	10-4-24	usability	normal	High
1059	when we click on filters and select the Multiple filters it shows multiple hover effects at a time	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) select category 3) go to different filters instantly	10-4-24	GUI	High	High
1060	there is a timer that shows the cash on delivery is available but there is no COD available in app.	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add item to cart 3) place order 4) check payment method	10-4-24	functionality	High	lownormal
1061	when we click on timer it shows shop now option but on shop now there is no content available in this which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) click on running time	10-4-24	functionality	High	High
1062	when we logout then cart item is still in the cart which is not valid	Oneplus 7T Kernel version 4.19.90-perf+	1. open jewellery application 2) add item to cart 3) logout	10-4-24	functionality	low	High
